

## Basic Price Guidelines

Thank you so much for your interest in my one of my custom cakes to celebrate your special occasion. I take great pride in every cake I make and each and every one is made to order with the recipient specifically in mind.

I get a lot of questions regarding the price of my cakes and unfortunately this is not as simple as it might seem. Without knowing the details and degree of difficulty of a cake I cannot begin to estimate the time and additional expenses that may be required. This is because although two cakes may be the same size and serve the same amount of people, some designs are much more labor intensive than others.

Base prices for tiered cakes begin at \$5.50 per serving. Fondant covered cakes are an additional \$1.50 per serving. Please keep in mind that the price may increase depending upon the difficulty of the chosen design. The minimum charge for any cake is \$60. If you would like to provide me with as many details as you can or send me an inspirational picture I would be happy to give you a NO-OBLIGATION price quote.

I have included some sample cake diagrams on the following page to help determine the size cake you would like. These diagrams are a great reference but are not the only options available. If you have a different tiered design in mind than the diagram shows for your number of guests the tiers may be adjusted so that more or less tiers may be used to serve the same number of guests.

## Cake sizing/servings

The servings for each cake size are based on the industry standard. Each cake tier will consist of 4 layers of cake, 3 layers of fillings, and will be approximately 4 inches tall. A serving is approximately a 1" x 2" x 4" slice. If you anticipate serving larger slices you may consider ordering additional servings.
