## Add Time

It's a day you'll want everything documented, so invest in the time necessary for me to cover it all. More time means more pictures and often translates into a less rushed schedule. 8-10 hours recommended, 12 hours max.

## 2nd Photographer

I prefer to work as the solo photographer and I think you'll get the best results that way. Having me around longer is a better investment than two photographers for less time IMHO. If you are interested in videography, that's cool, just ask for my list of video teams I mesh with.
