

Wedding Cake Pricing Guide

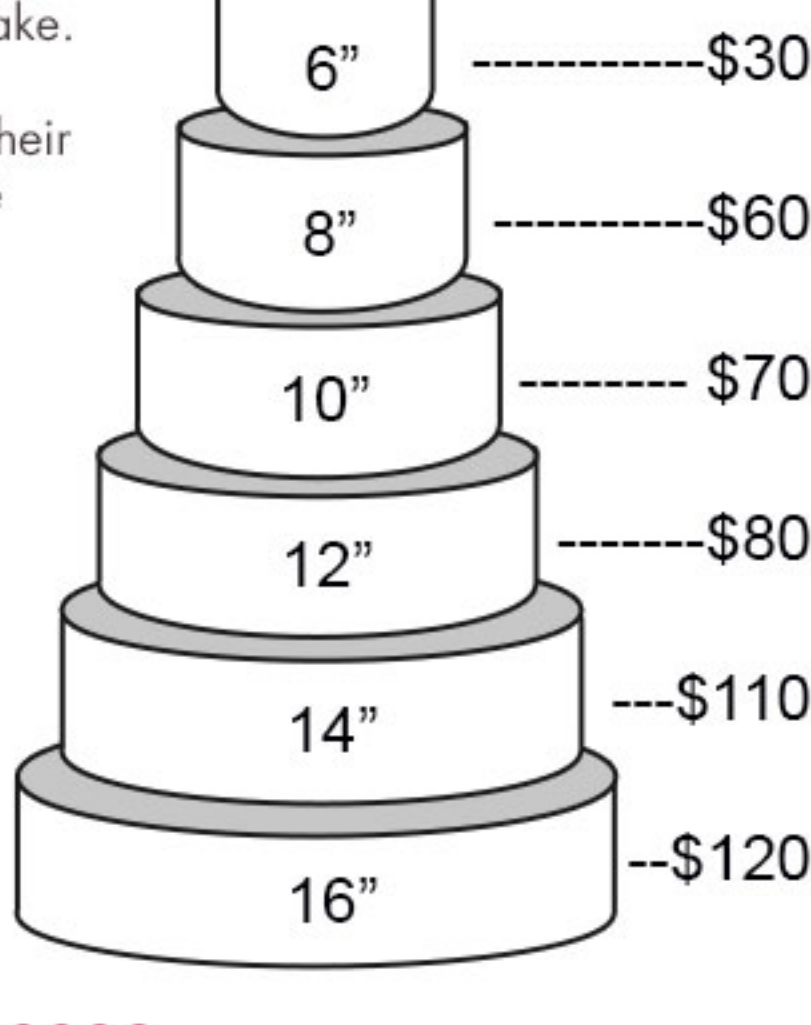

Tiered Cakes*

*Above prices are for any flavor of cake with buttercream icing. Fondant, specialty fillings, different cake flavors, other tier shapes, sugar flowers, real flowers and other embellishments may increase this cost. Prices subject to change. Delivery and setup charges vary depending on complexity of cake and distance to venue.

Dummy Cakes

What is a dummy cake? Dummy cakes are tiers made of styrofoam that are decorated with buttercream and/or fondant to match the rest of your cake. Many couples use dummy tiers combined with real cake to make their wedding cake look taller and more impressive while saving on cost.

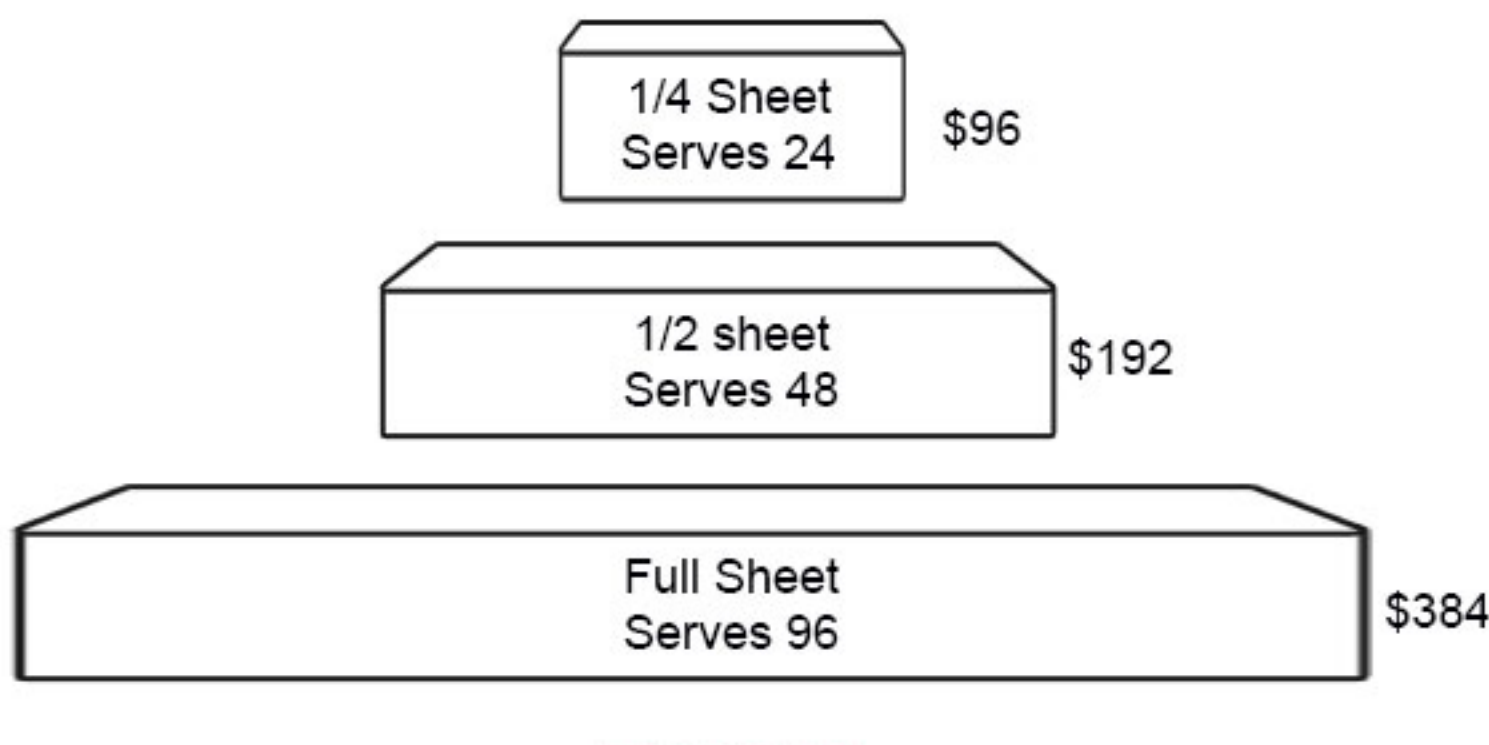

Cutting Cakes

Sometimes you just want something small. Either you're having only a few guests at your wedding, or maybe you just want a cake for photos and cutting, then supplement with sheet cakes or cupcakes.

Sheet Cakes

Sheet cakes are another great way to save money on your wedding. Rather than having a big tiered cake to feed all your guests, consider having a smaller cake on display. Then, serve sheet cakes from the kitchen. They will be made with the same flavors and icings of your display cake. Sheet cakes are 2" tall with no fill layer.

Cupcakes

Cupcakes are a great way to celebrate your wedding! Mix and match styles for extra fun. Combined with a cutting cake, cupcakes can really make a splash. Standard-sized cupcakes with buttercream start at \$3 each.
