THE VALUE WE BRING

- If you watch our films, you'll notice that they are honest, heartfelt, elegant and cool. That's because we don't just point our cameras at stuff and throw it all together with cheesy music. **We actually dive in and spend a ton of time and creative energy making your film into a piece of art.**
- Photography is extremely important, and we know some amazing photographers who we'd be happy to recommend! However, **photographers simply can't capture audio**, and many of the fun, emotional, and exciting moments will fade into the past memory if you don't have a super cool videographer there capturing the subtle movements, motion, and life.
- We see this work as a service, and when we're at your wedding, we'll be one of the most helpful people there. We know weddings can be crazy, and we will be there to open champagne bottles, **keep everyone on schedule, and keep everything fun, light, and running smoothly.**
