VIDEO COLLECTIONS
WEDDING ADD ONS AND THEIR SIGNIFICANCE

RAW FOOTAGE

Raw footage allows you to download all the parts of your day that are too long for your 4-7 minute long wedding video edit! For example, moments like your full first dances and ceremony/Reception speeches will be too long to make the cut for your video. With raw footage you get access to everything filmed on your special day! All raw footage is sent to your email in a dropbox folder where you can access and download on your computer.

MULTIPLE CAMERAS

Filming with multiple cameras allows us to capture more angles for a more detailed final video result. This also provides a safety net for videographers in case someone walks in front of one of the cameras. If one angle is blocked you either have one or two more angles to choose from and no events during the ceremony are missed! We always have a 2 camera setup included with our service.

SECOND SHOOTER

A second shooter/assistant is so good for weddings at all times. So much less stress on one single videographer. It also helps us to be more time efficient with our shots in getting more angles or more documentation especially when multiple moments are happening at the same time. This tends to get very tricky for a single videographer but having a second shooter solves this issue. Transporting our gear to a new location or breaking it all down and loading it that we will be ready to leave on time is also a job for the second. If there is no Second then the videographer has to leave early from each location to go to the next for setup. Which means missing moments.

AUDIO SERVICES

Audio services allow you to relive your special day a little more in depth. Instead of just watching the video and listening to a song that you like, you also get to hear yourself speaking in special times like the ceremony vows and reception speeches. We offer 2 professional forms of audio (lav mics and XLR recorder) that both outperform the audio coming out of the camera.

1 - 2 MINUTE HIGHLIGHT VIDEO

These videos are perfect for social media! It's super short and to the point with all of the best/most emotional moments during your special day. The Highlight Video set to the music you choose. The Highlight Video wraps up your entire day into a short presentation... perfect to show folks what your day was like without having to sit through your entire Full Length Film.
