Monthly phone consultations up to one hour, pre-wedding site review. Consultant will be on site or the entire wedding and reception.

#### Why should you hire a wedding planner?

Today's modern couples likely have full time jobs keeping them busy during business hours. A wedding planner is key to planning a large scale event without the headaches and stress that comes along with such responsibilities. A wedding planner can usually get deals and discounts that a couple couldn't normally get on their own; this comes from building rapport, and giving repeat business to the vendors.

#### Feel that your budget is too small for a planning professional?

This may be true for some wedding planners, but *Going To the Chapel Weddings* has three special packages that are sure to fit your budget. We also offer block consultations that you can schedule as needed, to verify you're on the right track. During these consultations you can ask questions, seek vendor recommendations and receive guidance on any issues that may come up.

#### Awkward happens...

More often than not, a cringe worthy moment will come up at some point. Having a skilled professional around can mean the difference between everyone remembering when Uncle Phil tripped after one too many, or everyone remembering the beautiful moment of your first dance as a married couple!

\*All venues sites outside a 50 mile radius will be subjected to a travel fee.

\*Bi-monthly phone consultations time vary by package
