"K&S" ability to capture emotion and priceless memories was like nothing I had ever seen. Their ability to use light to capture different elements of scene is a talent that cannot be learned... it is truly a gift.

Our Style

We live for these moments and capture them for the two of you to look with laughter and happy tears.

We capture tender moments like you and your mom embracing and or the first time your dad sees you in your wedding dress or the fun dance you and your mom have planned. And we capture that without you ever knowing it. So

when you look back through your wedding photos, you see those fleeting moments are now frozen in time.

hi!
