

*All Inclusive Packages from
One of Lake Tahoe's Most Trusted
Wedding & Honeymoon Planning Specialists*

CONGRATULATIONS on your engagement! It would be a pleasure to work with you to make your special day AMAZING! Let me start by introducing myself. My name is Angela and I am the Senior Wedding & Private Event Specialist for At Tahoe Weddings & Special Events at the Pine Cone Resort. Our venue is a tranquil estate nestled in the majestic tall pines in Zephyr Cove, Nevada. I would be happy to create a custom wedding planning package designed just for you, to provide only services that you need and that fit within your budget. I have been planning weddings in So Lake Tahoe for years. I am a member of the South Lake Tahoe Wedding & Honeymoon Association.

Through this group of incredible wedding professionals, I am able to provide you services from THE BEST OF THE BEST on the entire lake. Day of coordination is included with all of our packages if you choose to book through us at any of our two dozen venue locations. I am also available to provide pre-planning and coordination services by the hour or as a package.

Planning rates are as follows:

1 hour initial consultation is free of charge

\$35/hour for pre-planning services if you just need a few hours.

\$25/hour for day of coordination for ceremony only. I do not charge for travel if your ceremony is within the South Lake Tahoe Area. I charge 1 hour for coordinating your rehearsal regardless of length of time. The rehearsal is a vital part of making sure your day turns out exactly as you dreamed of.

\$200 for day of coordination for ceremony and reception. I start in the morning before set-up and stay until the end. Sometimes this is a 12 hour day. I make sure everything runs as planned, work with all of your vendors, make sure everyone is in place as they should be. Last minute emergencies always happen, I will be there to guarantee each is handled to take the stress out of your special day.

*** outside of the immediate South Lake Tahoe area I charge for travel time but not miles*
