# Lighting

## **Moving Heads, Technician Controlled "Intelligent Lighting"**

The staple fixture for any lightshow... Complete computerized control over movement, color, pattern, and effect. Moving heads add more than just intense dance floor (nightclub) style lighting; they allow complete flexibility in the lighting design with the ability to put just the right pattern and color in just the right place to achieve a specific look or the ability to put a spotlight where it's needed when it's called for. Standard event packages consist of two, four, six or eight moving heads on upright truss (wrapped in fabric) however, we can custom configure or rig equipment to help you realize your vision!

## **Wireless LED UP-Lights**

Smooth, rich, computer controlled room, truss and architectural wall washing. Wireless or wired, choose a single color to compliment your event's theme or enhance your lightshow with a completely interactive effect that will change color, fade, flash and dance with the music. Ambient and tasteful or wild and intense, the lighting technician will keep complete control of the up-lighting as the event progresses.

## Custom Monogram

A projected pattern: A name, monogram, graphic, image or corporate logo. Can be loaded into static fixtures or into moving lights for motion and rotation. Standard cut metal for basic patterns or high resolution black and white or color glass for complex images, we can produce gobos utilizing your custom artwork or we can help design your idea for you.

## Plasma TV's & Big Screen Projections

## LED Video Wall – Screen or LED Wall DJ Booth

This product is the “Jumbotron” of the future, made portable. It can be used at any event where the brightest projectors just won’t cut it either has you see in the picture above or has a DJ booth. LED Video walls can display any type of log, animations, visuals, and video presentations you can imagine. Full walls consist of modular panels that can be configured to many sizes.
