

## Wedding Packages

All of our wedding reception packages include 6 hours of entertainment that can be divided however you want, ie. cocktail hour, dinner, dance, etc.

Also included are high quality wireless microphones to be used for speeches.

We tailor the sound system for each venue we are at with our high quality sound equipment. We make sure sound is spread evenly across the venue during dinner and for the speeches, and then make sure sound is focused on the dance floor for the dance so that people can sit and talk if they want. We also use at least one sub-woofer for every event to ensure a full and rich sound.

## Reception Prices
