Q: WHAT SHOULD I PLAN TO SPEND ON WEDDING FLOWERS?

A: Since every wedding we do is custom designed for the individual couple, there is no definitive answer. We can, however, give you some general guidelines. For most of our clients, flowers are a top priority at their wedding. If you are planning an average size wedding plan to spend approximately \$35.00 – \$75.00 per guest at your wedding (inclusive of tax and service/delivery charges.) So that means if you are expecting 100 people at your wedding you will probably spend between \$3500.00 and \$7500.00 on flowers. The style of design and varieties of flowers and the quantity of arrangements will figure prominently in the final budget. Of course, it is possible to spend more or less. If you have a particularly large wedding party or require a lot of décor for the ceremony or have an exceptionally small or large number of guests, this formula may not be valid for your event. During our initial telephone conversation I can usually give you a good estimation before we schedule a consultation. I look forward to hearing from you!
