VIDEO PRODUCTS EXPLANATION:

Teaser (about 30 sec – 1 min) 150

Explanation: Teasers are shorter versions of a highlight video, clip, or film. Some producers may also use the word “trailer”. There are a huge variety of styles on trailers, but most of the times they are fastest turnaround edits and are used to announce content of the wedding highlight or for commercials in commercial videography.

Highlight Video (about 4 – 7 min) 300

Explanation: A Wedding Highlight Video refers to a complete film of the day, from start to finish of the coverage in short video form. Unlike long-form wedding video, these Feature Films are shot clip by clip, in a way that will all come together in the editing room.

A Wedding Highlight Video presents the wedding in an interesting/compelling/creative way and also shows it as an incredible love story. As cinematographers, we see our responsibility to bring up the emotions and give life to images and sounds through creative edition we portray not only an event but also the personality and emotions of the couple.

Documentary Video is included in every package; length depends on the chosen package (from about 10 – 60 min)

Explanation: This is the option that is closer to more traditional wedding video. It's basically a chronological video of the wedding, the way it happened, in its most extended form. If you want to see the whole wedding day, the way it happened, with simple cuts between clips, you have Documentary video included in all our packages above 5 hours.

Given times are only approximate!
Edited products will be delivered using some online service.
