About Me

Hello my name is Lisa. My husband and I opened Knoxville Neon over 30 years ago and in 2019 I decided to expand our business into the wedding industry. I was inspired to make this move when my daughter got engaged and we realized how few neon lighting options were out there.

I look forward in working closely with you to design your perfect light installation. You can opt to say a short message, or go for a classic sign. Lights are available in a variety of colors, including simple bright white for those who prefer a more minimalistic look. Lights are available in traditional glass neon and led neon.

I look forward to working with you.
