Sure! Add a hard drive with all the footage for \$500

these packages are designed for couples who want quality photo and video, without all the frills. The editing process is much simpler, which means that a lot less time is spent editing. The photos undergo quick processing for color and exposure correction, then they are processed with an additional filter if you choose a dark or light style. Removal of objects or changes to body shape are not included this process, but can be done after the gallery has been delivered, upon request, for \$10 per image.

books & albums

leather bound albums

These professional, high end albums have a thick core between the pages. The pages are made of high quality photographic paper and are custom designed with your images. One (1) page is considered the full spread when the book is open and laid flat, as pictured below. One page generally holds a minimum of 2 images and each half is referred to as a "print". There are several color options for the cover and they can be made with a cut-out window to reveal a photo on the cover. 20-60 images may be selected for the album design and additional pages are limited to 8 images per page.

photo books

photobook

album

Photo books are very similar to albums. The pages lay flat when opened and both are printed on the same, high quality, photographic paper as the photo albums but do not have the foam core between pages.
