Videos by Kip offers several wedding packages ranging in price and editing style. All packages contain a minimum of 8 hours of service which includes pre-ceremony and full ceremony coverage, as well as coverage of the formal photo session. The groom will have a wireless lavalier microphone attached to him to capture clear audio during the ceremony. Reception coverage will include: cocktail hour, bridal party introductions, 1st dance, cake cutting, toasts, and any parent dances. Plenty of epic dance moves will be captured on video as well. Please visit www.videosbykip.com for videos samples. Happy wedding planning!

Photo Presentation – Contact for pricing

Additional Camera or Videographer – A 2nd camera is a great way to capture your wedding day from a completely different perspective. A static camera would be set to capture a wide shot or alternate angle of the ceremony while the main camera focuses to capture the best perspective for your vows and rings exchange, etc. A 2nd videographer would make it possible to capture each moment of your ceremony and all reception's main events to the best of our abilities. One of us would focus on capturing a wider perspective with the ability to maneuver around, while giving the other an opportunity to capture close-ups of the bride and groom with the possibility of reaction shots of your loved ones.

GoPro Option – If you want to add a fun alternate perspective to your wedding day, this is the way to GO! Adding a GoPro is a great way for bridesmaids and groomsmen to give a little message before the ceremony and is perfect for the limo ride between the ceremony and reception. The GoPro can also be used as an alternate camera during the ceremony as well as reception. The GoPro would add a little more magic to those epic dance moves and can maneuver well on a crowded dance floor.

Bride/Groom Preparations – If you want to add a little more to your day, this is a great way to display what it's like the day of the wedding for the bride/groom. From having fun moments with your bridesmaids/groomsmen to precious moments with your parents before you head to the ceremony, this can really add to the memories of your special day. The videographer arrives 2 hours before the ceremony begins at the home of the bride/groom or wherever they may be getting ready. I will edit it comparable to the intro montage with use of real audio.

Introductory Montage – With any package, I will capture the moments before the ceremony. This feature may include those moments of the bride and groom getting ready and hanging out with bridal party, guests being greeted/seated, shots of the facility inside and out and any other happenings before the start of the ceremony. With the introductory montage, I will edit together the best of those moments accompanied with slow motion, transitions, opening titles real audio, and music.

Formal Photo Session Montage – Same idea as the intro montage only it will include shots of the photo session that takes place with the photographer immediately after the ceremony and/or if you decide to go to a different location to take photos.

Cocktail Hour Montage – Similar to the above mentioned montages, this is set to music with cocktail hour moments at the reception. Shots may include guests arriving and mingling at the reception along with various shots of all decorative pieces, such as: tables, centerpieces, cake, cookies, guest place cards, and anything that is on display.

Basic Highlight Reel – Relive the most special moments of your day set to music with smooth transitions and slow motion effects. It's the perfect way to end your wedding video. Length of highlight is typically 5 - 8 minutes.

Master Highlight Reel – This is a great way to share your special day with friends and family or to just enjoy your day in a condensed form. It is a 15 - 20 minute edited masterpiece of your wedding that includes the most memorable, special, and fun moments from your day, set to music and including various real audio.

Photo Montage – Pick your favorite photos of the two of you growing up, dating, or any special photos from your lives together and with family and friends. I will set them all to music of your choice and add in a few titles and smooth transitions. You may have it arranged to play at your wedding or have it inserted in your wedding video. Either way, it is a great way to add more sentiment to your wedding day. Prices vary. Please contact for more info!
