Congratulations!

You said "Heck Yes!" And now you're engaged!

And we are just so excited for you!

SARAH & DAVE PHOTOGRAPHY
bright, authentic, joy-filled wedding images

WWW.SARAHANDDAVEPHOTOGRAPHY.COM

we are SARAH & DAVE

We're husband and wife wedding photographers, and while our photography takes us all over the east coast, we're based right in the heart of the city we adore, in Richmond Virginia. We somehow manage to love exploring new places and the latest restaurants just as much as we love staying in for a home cooked meal and a relaxed game night in with friends. Our goal is to photograph every wedding with the care and focus with which we would want our own wedding to be photographed. And that starts with an amazing experience with us from the very beginning until even after your wedding day is over. We've created our first class S&D wedding photography experience for you that is full of special treats and exceptional service and care, that is truly unlike anything else. We'd love to tell you all about the process!

Our Style
bright. authentic. joy filled.

Friend, Your wedding day is one of the most impactful moments of your life that deserves to be celebrated and beautifully documented with care. We just love capturing the joy of that first day of a new marriage, and creating beautiful images for our couples. We know that you not only deserve your own beautiful wedding photos, but an amazing wedding photography experience. We will be fully invested in you and your wedding photography experience all the way from the first time we interact, till long after your wedding day has passed. Ultimately we want to serve you well. Our couples know that when they choose us as their wedding photographers its not just another transaction, but an investment. This is the one decision in all of your wedding planning that endures far past your wedding day- once your dress is put away, your bouquets are dried out, the cupcakes have all been eaten. Invest in your wedding photography experience and your memories. It is so so worth it.
