F.A.Q.'S

Why should I hire Shanelise Artistry for my wedding day?

It is very important to hire a professional makeup artist for your wedding day. We will ensure that your makeup will last all day and photograph beautifully in both natural and artificial lighting. Your wedding day is not day to stress about doing your own makeup, or having a friend do it. Only a professionally trained artist will ensure that you will look and feel your absolute best. Your makeup is particularly important to have done by an experienced professional as you want to make sure you look timeless and classic for your photographs that will last a lifetime. Only professional quality products are used to ensure a flawless look for the entire day. We are known for our reliability and professionalism and we ensure that our clients look and feel their best on this special day to celebrate!

How far in advance do I need to book?

The sooner you book the better! 3-12 months in advance is advised, but a year and half to two years is not out of the norm! Are you last minute? No problem, sometimes there is availability. If not, recommendations on other artists in your area will be made!

I have a large bridal party, can you accommodate?

Yes, we can accommodate as many people as you wish as long as time allows! An additional makeup artist if needed, is available with an additional fee.

What is the difference between airbrush and traditional makeup?

Every type of makeup has it's own procs and cons. Every makeup artist will have their own opinion on what they prefer to use on their clients. Ultimately, it all depends on your personal preference. IF you cant decide between the two, do a trial with both and see what you're most comfortable with, Almost 80% of all clients of ours choose and prefer airbrush.

Airbrush is a lightweight liquid makeup applied through an air gun and compressor that produces a thin, even layer of makeup in a spraying motion. It is the most HD (high definition) foundation created. The fine mist of color covers the skin and gives the appearance of a flawless complexion.

Shanelise Artistry will mix foundation colors for a perfect blend to match your skin tone. Airbrush is ideal for clients who are not used to wearing makeup or prefer a more natural finish and feel. Airbrush makeup is sweat, tear and transfer resistant and photographs beautifully.

Airbrush makeup is not to be confused with the ever so popular "airbrush" tool used on the program "photoshop" to smooth texture of the skin. Airbrush makeup will even out skin tone, but does not correct texture problems with the skin such as pores, acne, moles scars, etc. Other products will be applied if texture is an issue.

Traditional makeup is a Liquid, cream, and/or pressed powder that is usually applied with a sponge brush or finger tips. Traditional makeup comes in the widest variety of any other makeup, with every shade available. It's also the most versatile of all the makeup, it can be as basic as a sheer tint of coverage, or combined with other properties to create a makeup that targets specific problems. Most traditional makeup is ideal for clients who need very full coverage, or have facial hair as the product can be pressed into the skin.

If you have any additional questions, please don't hesitate to ask!
