## A NOTE FROM THE PRODUCER:

I take a considerable amount of time to comb through all the video clips to make your story unforgettable. That's why it may take up to three (3) months to complete, and the amount of work is reflected into the cost of the project.

Here's a glimpse of the steps that it can take to edit a video:

- Importing all video clips
- Tagging and organizing footage from multiple cameras
- Cutting all video clips for best shots
- Analyzing useable footage and creating a storyline
- Find the perfect music (longer videos need multiple songs and requires more time to find the perfect mix!)
- Syncing multiple audio sources
- Review & corrections
- Color grading & stylizing
- Export in Ultra High Definition
- Upload and delivery

For example, up to 5 hours coverage means I am at your event filming for up to 5 consecutive hours. That can start a few hours before the ceremony to ensure getting venue footage and preparations.

## **LICENSED MUSIC**

I purchase the rights to use music so that your video can stay online without risk of being taken down. I search for unique music that fits the personality of the bride and groom. Some videographers will put popular copyrighted music on a video, but if they did not get permission or purchased a license, then they run the risk of the video being taken down or worse.

\*Clients may suggest music genres, but due to licensing limitations, videographer makes final decision.
