- A multitude of print products available for purchase in your password-protected online lab.
- Custom printed 4"x6" slide box with 16GB acrylic USB drive .....\$175

\*From our years of experience, the vast majority of wedding day timelines require 10 hours of photography from getting-ready to open dancing. Unless you are having one of these three options, trust us, you will probably not need more than 10 hours of actual photography: **1. Morning church ceremony** (such as 11:00am). **2. Sparkler send-off** at the end of the evening. **3. You 100% want the last dance captured** because it will be something special.
