## Why Forpix

Our creative thinking and individual approach is what makes our wedding video different! Enthusiastic feedback from our clients only confirm that our work is something extraordinary! By the use of professional technology and experienced team we capture the true atmosphere of the whole day. Due to the time-consuming process of making the final product we are limited to only a few weddings per year. Would be your wedding on of them?

## Consultation

In order to give our clients the best results we can, we arrange an appointment with them before the wedding day. Depending on the distance we either meet them in person or (via videocall). We discuss about their vision of the final product and also details of the whole day - it also helps to break the ice 😊
