

# KACEY MARIE *Events*

## *Full Service Planning and Design*

One of our biggest goals is for you to feel like guest at your own wedding! The way to get there is through our Full Planning and Design collection. Your wedding will be one of the most personal days of your lives so we want to get to know you! We start our process simply by talking through what is important to you and prioritizing those elements. This will lead us to customizing your budget. From there we'll be able to build your dream vendor team, create a custom design board, personalized wedding website, invitation suite, etc. We will be by your side through the entire process, from choosing your venue to watching you walk down the aisle! Can't wait to get started!

## *Wedding Management*

Our Wedding Management collection is for the couple who has done a majority of the heavy lifting, but needs help bringing everything together! We will work most closely together during the last 90 days leading up to your wedding with a couple of focused interactions throughout the other months. Whether you book this collection 4 or 13 months in advance of your big day, we will start by talking through what stage of the planning process you're currently in. This will allow us to gently guide you towards the areas you need to focus your planning on in order for us to be able to come together at the 90-day mark and really hit it out of the park!

## *Investment*

Most of our Full Planning couples are spending \$75,000+ However, there are many factors to be considered! How many guests are you expecting, where is your dream venue located, are you looking to WOW your guest with food, specialty cocktails, personalized design elements (maybe all of the above!). These are all great questions to think about. We're here to assist you in constructing a realistic budget while incorporating what you feel are the most important elements in creating your dream wedding.
