What is it like to work with Heidi Knight?

All photographers are not created equal.

Having amazing photos that make you look and feel AMAZING is the number one goal, but boudoir photography is usually a little out of most people's comfort zone. My client's experience before, during and after their session is the most important thing for me.

You choose a professional photographer because you want a professional experience. I have been in business since 2007, and when I realized that making women feel empowered and beautiful was my passion, I found my ultimate favorite niche in boudoir photography! Yes, I photograph other things, but boudoir is my happy place.

These sessions are SO MUCH FUN!!!

- You deserve to feel safe and comfortable and confident
- You deserve a professional photographer, not a friend with a camera.
- You deserve a full-service experience.
- You deserve to be completely satisfied with your photos!
