

# Photo & Video Investment

Ten, twenty, thirty years from now, I want you to look back at the artwork I have created for you and remember the love and joy you share with each other. It's my goal to make lasting, powerful and emotional content for all my clients.

When my wife and I married 10 years ago, we couldn't afford our own photographer so I understand the difficulty of planning and paying for a wedding first hand. I know how important it is to have memories captured but the pain of knowing you can't afford someone you can trust. That's why I have spent years developing a business model that offers solutions for all clients at any price point.

## RAW Photo &/or Video

With the rising popularity of DIY editing, I began offering RAW Photo and Video services to clients for weddings, birthdays, reunions, anniversaries etc.

It's also worth noting that the color that comes straight out of camera isn't half bad! It's more than good enough if your budget is super tight. It's more important to have an experience photographer / videographer than it is to have "nice edits". The classic saying "you can't polish a turd", it's true for photos as well :)

RAW Photos will come in two variants, the .NEF files and .JPG files. Both will be uploaded directly to Drop Box typically within a couple days of the event.

RAW Video will have audio synced and coloring applied and uploaded directly to Vimeo for easy playback and download!

*RAW Photo - \$165.00/hr*

*RAW Video - \$165.00/hr*

*RAW Photo & Video - \$210.00/hr*
