

THE WEDDING PACKAGES

Every wedding couple is different, every wedding is different. These are sample packages for that reason. These just give you an idea of different price points and what can be included. Throughout our conversations, we pick and choose what type of portraits are the most important to you both, what parts of the wedding day are the significant to you both, and what you want to put a special focus on throughout the day. Because of that, I love to create a custom package for each couple based of your individual needs and wants for your wedding gallery if none of these seem to be a good fit.
