Free Consultation

My business stands out above other Services with affordable rates and an all-inclusive package for Audio, Lighting, and Video. Using the most reliable and mobile equipment. I enjoy every aspect about my work. From the first phone call and meeting I aim to understand my customers needs and expectations. I enjoy planning and figuring out every item. I work directly with the client to customize their request to meet each and every need. From start to finish I make sure I arrive early to set up properly and test all my equipment to provide the best service for the whole event. I make myself aware of customer's requests and that everyone is enjoying an experience they will never forget.

My typical process for working with a new customer is to find out all the details of the event. I ask about the length of event, the location of the event, and if I am setting up indoors or outdoors. I get the full name of the bride and groom, bridesmaids, groomsmen, family members, and any other special mentions for the event. I ask them for details about the opening ceremony, cocktail hour, dinner, cake cutting, dancing, and special wedding announcements. I keep in direct contact with the customer during times when I am working on the timeline. I make sure to update song requests and organize all the work so everyone involved can easily see the structure and planning of the event.

Q&A

- **What should the customer know about your pricing (e.g., discounts, fees)?**

My baseline pricing is \$100 per hour. It includes a fully Customized Timeline & Music Playlist, 2 L1 Speakers From Bose, 1 Traktor Control S4 + DJ mic for announcements, ADJ Dance lighting, 2 Microphones with stands for Vows and/or announcements. I can work with customer's budgets as well to try and give them the most effective rate.

- **How did you get started doing this type of work?**

I started doing this type of work for two of my close friends who needed a wedding DJ that could offer them additional dance lighting and a film of the event.

- **What types of customers have you worked with?**

I worked with English and Spanish speaking families looking for a DJ to work weddings, anniversaries, birthdays, quinceañeras, and school
