The elegant line, the purity of the colors, the accolades from the younger generation, make the Young Book an extremely versatile project, iconic and always chic. The idea developed from the yet unexpressed need to create more flexible lines dedicated to young and trend-conscious couples. Created for photographers searching for alternatives and willing to offer a fresh and distinctive service, capable of distinguishing their artistic personality.

The concept

Fresh and up to date, the YOUNG BOOK perfectly encapsulates the fine balance between timeless craftsmanship and the interpretation of a yet unexpressed desire. It answers the call for a product different from formal, classic and sumptuous books, allowing to choose a simple and fresh product instead, ideal for those who love a combination of modern aesthetics and practicality.

Design

A state-of-the-art product where layouts are the main characters. Young is a book of minimal and rigid lines, composed by different elements combined in a refined harmonic balance of materials and shapes, which become the focal point of a line reflecting the personality of those who choose it.

Uniqueness

Young Book represents going beyond of a formal and yet unsurpassed limit, where the book was obtained through the creation of thick covers, with a round spines. Today curves disappear, covers get thinner making way to the essential shapes of the box and book for a minimal and simple result which denotes a strong avant-garde taste.
