

WEDDING COLLECTIONS

Enjoy every moment of your wedding

We'll create honest, emotional and authentic imagery without looking overly posed or forced. You can enjoy your day knowing your wedding will be documented with real emotion as the focus. Ten years from now, you will open up your wedding album and be drawn back immediately to every magical moment.

Every wedding includes individually retouched, high resolution files. You will have unrestricted print rights, so you can enjoy your images however you like.

More importantly, every wedding also includes an engagement session. These sessions are so important - not only will you have great images for your wedding website, social media, your save-the-date card or just to display on your wall, but your engagement session will also give us an opportunity to work together. You'll learn how to look your best, and you'll get better (and more images) on your wedding day without worrying about feeling awkward!

Every wedding collection includes a wedding album design and almost all include an album. Instead of just downloading your images to your hard drive and sharing a link with your family and friends, you can show a curated heirloom-quality album that is both a keepsake for you and a gift for future generations.

We'd love to learn more about you, how you envision your day and what is most important to both of you.

Collections begin at 3500. Then, we customize options for each couple.
