## BOUQUET OF FIREWORKS

We Believe art and weddings are incredibly similar things. Art and Weddings exist in our world as ubiquitous, every day things. Art is the music on the radio, the design of your home, the logos of your favorite restaurants, the tv you watch, the literal paintings on the wall of wherever you are.

★  
You are drowned in it.

★  
Weddings are playing house as a kid, having your parents ask you if you have a boyfriend or girlfriend in grade school, family friends, divorces, the constant buzzing question of if and when and how you are going to get married, the concern for The One.

★  
You are drowned in it.

★  
They are physically confined to one space and do not do anything to your body to leave an effect~ your personhood before your wedding or before you look at an inspiring piece of art is the exact same as afterwards~ and yet somehow you are totally changed, despite nothing, actually changing.

### ★.✧.🌸. Bouquet of Fireworks 🌸.✧.+

exists on the idea that Weddings and Art are the same. We believe in the art making process not of planning your wedding, the "logistics", but the day itself, that aesthetic emotion OF the wedding. We are people trained to be artists humming about, searching for the nectar of inspiration, in weddings.

★  
Nikolas is a cinophile, graduated from a New York film school, with a deep love of Italian neorealism, soviet montage and French New Wave.

★  
Mimi is a multi-discipline visual artist with a love of color, Jim Hodges and the way asymmetrical lines play tricks on your eyes and bring out the beauty of people.

★  
Your day is a moving tableau to us, a story unfolding and a thousand small individualized moments, crystallized in our lenses, that come together to create a portrait of you and your love.

★  
We want to use all our talents, not just film and photography, but illustration and poetry and design, to show you how much Weddings and Art are the same, how much kisses are like firework displays, how much your vows are poems, and how much every experience you two have shared together leading to this moment, just one more moment in a life full of them, is a song you two hum to each other that no one else can hear. We cannot make music, but we can capture the melody in our work the best we can and give life to the Art Installation that is Your Wedding Day.
