Other Info

My services include every image taken the day of your wedding given to you on a high resolution DVD. This means you receive every image from your wedding along with the print authorization, which grants you permission to make any reproductions for personal and non-commercial use. This allows you to do anything you would want, except sell them.

To officially reserve your date, a \$500 retainer and a signed contract is needed.

Flash can be distracting, so whether it is required by your church or you would prefer no flash during your ceremony, no problem! The cameras and lenses I use do not require it even in low light churches. I shoot with 2 Canon 5D Mark ii cameras along with Canon L series lenses (simply the best!).

This will be the most important day of your life. These photos will grace the walls of your home, your parent's home, your children's home, and grandchildren's home for years to come. Photographing your wedding day is a responsibility I take very seriously. I give you the time, attention, and professionalism that I wanted on my wedding day. Let me know how I can make your day even more amazing than you imagined.
