

## CINEMATOGRAPHY

***Wedfilms Cinematography*** is a group of passionate Cinematographers with a common goal for producing videos of exceptional cinematic quality.

We approach each project and event we film with an open creative mind, focusing on romanticism and capturing natural, “real” footage. We are driven by our love for motion video and static photographic imagery. To us cinematography is not just a job, but a way of looking at life. For this reason we pour ourselves into our work, giving our best as it is a reflection of ourselves.

Our main aim in doing this is to capture precious emotions of events and the most important days of your lives to be remembered for the rest of time. You are the leading roles, giving life to our visions . We want to get to know your story. We want to tell your story. We want to get to know you as well as you’ll allow us, and as much as we can in the little time we have till your wedding day. We do what we do because you are unique. And we feel we can uniquely tell your story for you, and for those who know you and love you.

Our team focuses on emotion, on a smile, happy times, on your love. We have professional equipment that includes: canon camcorders, canon DSLR, Steady Cam, dolly and slider systems, mini jib, Drone , Virtual reality e.t.c .

**We are proud to offer the following cinematic experiences exclusively for your consideration and invite you to discover Wedfilms Cinematography.**

- Having a second Cinematographer can really add another dimension to the visual record of your wedding day. They can focus more on the more video journalistic elements by capturing different angles, spontaneous and behind the scene events when the main Cinematographer is focusing more on the key must have video shots.
