| PACKAGE DESCRIPTIONS | |
|---|---|
| ① HIGHLIGHT | ② FEATURE |
| <p>The highlight film is the main piece created from the wedding footage. This film features story-based video editing, sound design, color correction, and file processing. This style is used to show a highlight of all of the important parts of the day. The Videographer captures the whole event and edits it into one seamless highlight film. (5-10min.)</p> | <p>Along with the highlight film, a more detailed cut can be created to document your vows, speeches, dances, and ceremony in whole. The feature film is less intended to be shared with friends as the feature film, but it is more for the Bride and Groom to enjoy and have to look back on. Plus, you still get the Highlight Film to share with friends.</p> |
