

SURF & SOUND EVENTS

Thank you so much for taking the time to consider me and my professional entertainment and emceeing services for your upcoming wedding!

I offer a simple All Inclusive Wedding Package for \$1,900 which includes:

Ceremony Sound Production

(package price can be reduced if ceremony is off-site from reception and my services are not needed)

What I Bring:

- 1 column-array speaker (with battery if needed)
- 4 wireless microphones (2 lapel and 2 handheld, or 3 lapel and 1 handheld).
 - With lapels on officiant and groom guests are assured to hear everything clearly.
 - Handheld or stand-mounted microphones are excellent for readings.
- Music playback from my Apple device.
- Having live musicians or vocalists? I can definitely accommodate!

My commitment to excellence starts with having the best equipment. My column array speakers look and sound better than standard PA's. And top-notch wireless microphones and long-range antennas mean no drop-outs. A wirelessly (iPad) controlled mixer means no bulky soundboard and no cables running everywhere.

What I Do: I was a musician and sound-engineer long before I was a DJ. I'm bringing my decades of technical and artistic experience to one of the most important moments in your life! Microphones and instruments need to be properly pre-amped, mixed, equalized, and compressed to sound clean and clear. And wireless microphones require coordination to avoid interference. I not only have the right equipment, but also the skills to make it all come together.

Reception Entertainment and Emcee:

What I Bring: Entry-level equipment has its place, but not at your wedding! So I've invested in only the best. My EV Evolve column arrays and ETX subwoofers coupled with Apple computers, and high-res music files stored to disk provide reliable, clean, and powerful sound. My professional DJ booth and a touch of dance floor effects lighting ensures that your entertainment looks the part as well.

What I Do: I am bringing 8+ years and 100+ weddings of experience to the most important party of your life. I take so much joy in what I do, but we can't have fun if the details aren't taken care of. I communicate often, arrive early, and execute flawlessly. I am prepared, personable, flexible, and consider it my duty and delight to help you and your guests have the best reception possible! I also have a *Clean Music Policy.

*Clean Music Policy: While words like "clean" and "appropriate" are admittedly subjective categories, I will only play "clean" versions of songs. I also will not play songs that are grossly offensive or inappropriate even when there is a radio-friendly version. I would be glad to offer more clarity by phone if this is a potential concern in either direction. Thank you for your understanding.

The Best of Both Worlds: DJ & Live Music

What's the only downside to hiring a band for your wedding? Well, they're not a DJ, and DJ's can do a lot of things that bands can't. What's the only downside to hiring a DJ for your wedding? They're not a band, and live music is always a treat.

Included in the package is a live performance at your choice* of Cocktail Hour or Dinner. Depending on the details of your day I may even be able to do both!

What I Bring: As many as 4 acoustic guitars (2 6-strings, a 12-string, and a baritone 6) and one ukulele may be used to bring beautiful live music to you and your guests. These are coupled with my retro-style microphone and a simple reverb/harmonizer pedal to make the performance shine.

What I Do: I'm happy to tailor the performance to your tastes and preferences. I can be about as loud and energetic (think Bob Seger and American Authors) or as subdued and mellow (Jack Johnson and Eric Clapton) as needed.
