

# Aerialogists LLC Pricing

What Aerialogists LLC has to offer is literally unlike anything any other bar catering or event entertainment company is currently presenting, worldwide. Because of this, it's difficult to compare our rates to others in the general realm of our abilities as an event organization.

Our floor bartenders are hired at a competitive rate to any other bar catering company in the region. (approx. \$40/hour/bartender).

The only other "aerial bartending" offered by event companies locally include one 10-20 minute session of a single aerialist, sitting in one to two poses, while pouring champagne or wine from an aerial apparatus that they rely on the event venue to help rig in their space. The rate for the aerialist is generally \$1200-2000 for a total of 15-20 minutes during your entire event. On top of that, the client will pay another \$1500-2000 to have a professional rigger come into their event venue to rig from the venue ceilings or beams (if the venue even allows it).

Aerialogists, on the other hand, not only pour wines and champagne, but we also pour specialty cocktails, and pop open beer bottles, with each drink having separate choreography from the last.

We do this from our own portable, free-standing aerial rig. With padded feet and safety wires, our light-weight, aluminum rig will prevent any damage to venue ceilings or floors.

Aerialogists fly through the air for a minimum of 40 minutes per hour, of the hours we are hired to perform, (and we have a tendency to encore.) The cost for this is \$2000/hour for two Aerialogists, with additional fees for bar products, rentals, and extra optional services.

Working with your budget is our key to building the best possible package for your event. Call today to get a quote!
