

Owner & Photographer: NTG Photography

I am a photographer with a unique, artistic style and a love for candid captures. I specialize in portraits for couples and dabble in wedding journalistic work as well.

My personal goal is to preserve time to allow memories to stay put. I strive to preserve the raw emotions that was once felt when an image is captured and for that to be felt again once that photo is gazed upon again.

I aim to offer an important service that I have one shot to make right. What makes me stand out is the amount of quality and responsibility that I expect from myself at every job. My equipment are second to none. My cameras are the Nikon's flagship D4 & D5 that pair up with unique lens like Nikon 200 F2. A number of my photos are featured and awarded on Weddings, 500px, and TheKnot.

Please take some time to look around my website, and if you like what you see, do get in touch. If you don't see a package that specifically meets your requirements, feel free to contact me anyway, as I do custom packages as well. We can chat and I will be more than happy to prepare you with a personal quote.

Wedding Collections
