Event Packages

EXULTED from \$550-1000

You've planned most of the event yourself but now you're ready to enjoy the big day.

It's almost the big day! You've handled all of the details. You've hired all of the vendors. Everything is in place. Now, you are stressing about who is going to handle all of the details on the day of the event. You realize that you can't be in multiple places at once as you enjoy your own event, so you need someone by your side to patch up all the loose ends come wedding day.

ELATED from \$1000-2000

You're halfway there. You just need a professional to see it through!

You've been working through the motions of planning your event, but you're a busy professional. You're halfway through the planning but are now ready to turn it over to a professional to see it through to the end. At this point, you're looking for someone to generate ideas, find vendors, schedule appointments and manage the negotiating and contract process.

EXHILARATED from \$2000-4000

You want the complete package for an entirely stress-free process!

You're in the beginning or early phase or planning your event. You have started looking into vendors and maybe even hired one or two of them. Other than that, you are at a loss and have no idea how to finish the process! You're already stressing about the day of your event. You want everything to come off without a hitch and spend a day enjoying yourself rather than setting up for the event and directing vendors on what to do.
