How We Create Cinematic Memories

Before your wedding, we communicate extensively to ensure your films will be as amazing as your love is. Details and shots are discussed, and a custom timeline is produced. Your wedding is filmed with Canon Cinema cameras and lenses (with dual card slots for *immediate* backup). Professional wireless Sony microphones complete your films with intimate audio. Your films are edited *in-house* on Apple Pro computers in Final Cut Pro X and archived for 5 years. Films are delivered digitally (viewable and downloadable) with an interactive menu and via keepsake Blu-Ray disc. Your films are guaranteed to be ready within 60 days.
